

CLAIMS

I claim:

1. A cutting stand for sheet goods comprising:
supports, each support including a foot, a lower upright joined to the foot and an angled upper upright rotationally joined to the lower upright, the supports including connectors;
a carriage joined to the supports, the carriage having horizontal members selectively received within the fasteners of the supports, at least one horizontal member being selectively joined to sheet hooks, and the sheet hooks having platforms adapted to support sheet goods; and
a guide movably being adapted to be removably joined to sheet goods, the guide including a foot and a clamp joined to a straight edge, the foot having a bracket with a lip, the lip being adapted to engaged an edge of sheet goods, the clamp having a bracket selectively securable to a post, the post extending through post apertures defined in the bracket, and the post having a hook adapted to engage an opposite edge of sheet goods.

2. A cutting stand for sheet goods comprising:
supports, each support including a foot, a lower upright joined to the foot and an
angled upper upright joined to the lower upright;
a carriage joined to the supports, the carriage adapted to support sheet goods;
and
a guide adapted to be removably movably joined to sheet goods.
3. The cutting stand of claim 2 wherein the lower upright is rotationally joined to the
upper upright.
4. The cutting stand of claim 2 wherein the lower upright is joined to the upper
upright with a fastener.
5. The cutting stand of claim 2 where the supports are joined to connectors.
6. The cutting stand of claim 2 wherein the carriage comprises horizontal members.
7. The cutting stand of claim 6 wherein the horizontal members are 2X4 lumber.
8. The cutting stand of claim 6 wherein the horizontal members are selectively
joined to the supports.
9. The cutting stand of claim 6 wherein the horizontal members are joined to the
supports via connectors.
10. The cutting stand of claim 9 wherein sheet hooks are joined to one of the
horizontal members.
11. The cutting stand of claim 10 wherein the sheet hooks include a platform for
supporting sheet goods.

12. The cutting stand of claim 2 wherein the guide further comprises a foot and a clamp joined to a straight edge.
13. The cutting stand of claim 12 wherein the foot includes a bracket having a lip, the lip being adapted to engaged sheet goods.
14. The cutting stand of claim 12 wherein the clamp further comprises a bracket selectively securable to a post, the post extending through post apertures defined in the bracket.
15. The cutting stand of claim 14 wherein the post includes a hook, the hook being adapted to engage sheet goods.
16. The cutting stand of claim 2 further comprising sheet goods mounted to the carriage.
17. A method of cutting sheet goods comprising the steps of:
providing a foot with an upright;
selectively joining horizontal members to the uprights;
connecting sheet hooks on the lowest horizontal member;
resting a sheet good on the sheet hooks.
18. The method of claim 17 further comprising the steps of:
positioning a guide on the sheet goods.
19. The method of claim 18 further comprising the steps of:
clamping the guide to the sheet goods.
20. The method of claim 19 comprising the step of cutting the sheet goods.
